Fernando Leite Pagani

Computer Science Student | Based in Belo Horizonte, Brazil

fernandolp.work@protonmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science student at PUC Minas with a strong focus on **Linux**, **systems** and **DevOps**. I have used Linux as my daily driver since I was 13, build and maintain **14 public repositories** with **100+ contributions** in the last year, and self-host services on my own hardware. I care about fast, reproducible and efficient environments, and I prefer understanding how things work under the hood.

PROFESSIONAL EXPERIENCE

Open-source developer | Personal projects · Open source 2026 – Present

Open-source tools for the Linux desktop.

Building and maintaining open-source tooling, with **3 projects**, **14 public repositories** and **100+ contributions** in the last year. **MangoMod** — visual, interactive configuration interface for the MangoWM Wayland compositor (GTK4/libadwaita), forked and adapted from NiriMod. **Simple-Nvim** — modular, performant Neovim configuration built on lazy.nvim (LSP, completion, debugging). **Rofi-Scripts** — launcher scripts that make desktop workflows faster and simpler.

Youth exchange student | Rotary Youth Exchange · AVTEC Previously

Cultural exchange in the United States.

Lived and studied in Alaska, reaching **advanced English**, and had first contact with IT infrastructure at **AVTEC**, a technical college.

ACADEMIC BACKGROUND

B.Sc. Computer Science 2025 – Present (2nd semester)

PUC Minas — Belo Horizonte, MG

Coursework: Algorithms and Data Structures, Discrete Mathematics, Databases, Web Interface Development, Software Engineering.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, Lua, Bash, HTML and CSS

Systems & infra: Linux (Fedora, Arch, Debian), Docker, Git, Tailscale, Syncthing

Tools: Neovim, Wayland, Jellyfin, homelab / self-hosting

LANGUAGES

Portuguese: Native

English: Advanced
