PROFESSIONAL SUMMARY

Computer Science student at PUC Minas, involved in volunteer leadership, university extension, Linux automation and administration, and web development. Two terms as Interact president and participation in the WebTech extension project. Objective: technology internship.

ACADEMIC BACKGROUND

Computer Science | PUC Minas, Belo Horizonte | 2026–present · 2nd semester
Relevant coursework: Algorithms and Data Structures, Discrete Mathematics, Databases and Software Engineering.

High School | Colégio Santo Antônio, Belo Horizonte | completed in 2025

RESEARCH, EXTENSION AND LEADERSHIP

Undergraduate research | PUC Minas | 2026–present · supervised by Prof. Matheus Barros
Exploratory study of predictive AI and deep learning for image filtering and categorization. Current stage: deep learning fundamentals.

WebTech extension project member | 2026–present
Redesign of WebTech Journey pages and demos; standardization of components and visual tokens; documentation of the build process.

Interact President, Rotary | 2022–2023 and 2024–2025
Planning social actions, task distribution, volunteer coordination and fundraising campaigns across both terms. Actions to broaden participation in the club.

Rotary Youth Exchange | Alaska, USA | 2023–2024
Exchange program with programming classes and visits to naval engineering and maintenance companies and to AVTEC, Alaska's vocational technical center.

PROJECTS AND AUTOMATIONS

Homelab Linux | Fedora, Docker Compose, Nextcloud, Jellyfin, Syncthing
Fedora server with Docker Compose stacks for Nextcloud, Jellyfin and Syncthing. Monitoring of four services via Uptime Kuma and remote access via Tailscale. Data replication between the server and a backup machine with rclone and Syncthing; services used by four devices. Experiments with DuckDNS, port forwarding, Nginx reverse proxy and TLS.

Linux automation | Bash, systemd, Wayland
Bash scripts to query systemd scopes, list and terminate background applications, pause swayidle during focus mode and capture screenshots with OCR via Tesseract. Screen recording with interrupted-session recovery and MP4/WebM fallback. 20-minute weather cache with the last result available offline.

visualize_it | React, TypeScript, Vite
Application with 20 interactive lessons on algorithms and data structures, step-by-step execution, code in C or Java and complexity analysis.

Professional portfolio | React, TypeScript, Vite, Vercel
Bilingual site with a serverless function that queries the GitHub API. Token kept on the server and caching to reduce calls.

SKILLS AND LANGUAGES

Languages: C, C++, Python, Java, TypeScript and Bash · **Development:** React, Vite · **Linux:** Fedora Silverblue, Debian, Ubuntu, Mint, Arch, CentOS, Rocky Linux and Alpine; systemd, permissions and shell scripts.
Containers and environment: Docker Compose, Toolbox, tmux and Neovim · **Services:** Tailscale, rclone, Syncthing and Uptime Kuma.
Leadership and management: volunteer coordination, action planning and fundraising · **Efficiency:** task automation and self-hosted service administration.
Portuguese: native · **English:** C1, Cambridge English B2 First, Grade A (2026).
Availability: on-site or hybrid internship in Belo Horizonte, or remote within Brazil.
